Vern Paxson, PhD, is a Distinguished Fellow at ICSI and Co-founder and Chief Scientist at Corelight Inc., which employs the Zeek system he and his group have long developed to provide security teams with network evidence to protect large organizations and companies. His research focuses on internet measurement, intrusion detection, cybercrime, and censorship technologies. Dr. Paxson led ICSI's Networking and Security Group until 2022 and is also former Vice President of ICSI. He was a professor in the Electrical Engineering and Computer Sciences Department at the University of California, Berkeley, from 2007-2021, and continues to serve on the UC Berkeley faculty as a Professor of the Graduate School.
